

Our Partnership with HealthShare360 is About You

Millennium Medicare Connect, connecting you to the right Medicare resources, the right Medicare partners.

Medicare Connect

For more information visit - YourMedicareConnect.com

The Millennium Medicare Connect program is about connecting you to the right resources and the right partners. As your primary-care provider, Millennium wants you to be in good health, always! That's why we've partnered with the Medicare experts at HealthShare360.

We know Medicare can be confusing. Studies show those who are either uninsured or underinsured are less likely to take advantage of preventive services, and more likely to suffer poorer health outcomes. This matters to us.

Millennium brings you the resources to best understand Medicare and what's available to you. There are so many choices, and every year there are more benefits available. With Millennium Medicare Connect, feel confident you're choosing the right Medicare coverage for you.

HealthShare360 has the experience to guide you through this healthcare rite of passage, as an unbiased source of information, with the goal of making Medicare work better for everyone. We call our partners at HealthShare360 Medicare Navigators because they know all the plans Millennium accepts, and they help you compare options, so you find the plan that best meets your needs, with the right doctors and hospitals, the best prescription drug costs and the extra benefits, like dental vision hearing, and more.

Check out the online product comparison tool where you can see all the products, benefits, and premiums available wherever you are! Together, we're your trusted source of information to help you simplify Medicare and conquer the confusion of this complicated decision.

Feel confident you're choosing the right Medicare coverage for you with Millennium Medicare Connect and Healthcare 360.
